

Manufacturer's Information

Test No. 23-5041: Synthetic Drug Analysis

Each sample pack consisted of two items. Item 1 contained approximately 200 mg of 18% N,N-Dimethyltryptamine (DMT). Item 2 contained approximately 250 mg of cornstarch. N,N-Dimethyltryptamine is a Schedule I controlled substance in the United States.

SAMPLE PREPARATION: Prior to production, the appropriate amount of N,N-Dimethyltryptamine and cornstarch for Item 1 were combined and thoroughly mixed to ensure homogeneity.

ITEM 1 (PREPARATION): Approximately 200 mg of 18% N,N-Dimethyltryptamine was weighed out and deposited into a glassine bag, which was folded and secured with a label. The folded glassine bag was placed into a small zip top bag, which was heat sealed and then placed into a pre-labeled envelope.

ITEM 2 (PREPARATION): Approximately 250 mg of cornstarch was weighed out and deposited into a glassine bag, which was folded and secured with a label. The folded glassine bag was placed into a small zip top bag, which was heat sealed and then placed into a pre-labeled envelope.

SAMPLE PACK ASSEMBLY: One of each of the Item 1 and Item 2 envelopes were placed into a larger pre-labeled sample pack envelope.

VERIFICATION: The above substances were identified by predistribution laboratories, who used the following combined list of techniques: GC-MS, FTIR, TLC, Color Tests, TruNarc Raman, UV, GC.

Item	Synthetic Drug Group	Synthetic Drug
1	Tryptamine	N,N-Dimethyltryptamine (DMT)
2	No Synthetic Substance	N/A

The information presented here details how test samples were prepared as well as any design specifications. This information does not necessarily represent the answers that should or could be obtained from an examination of the sample(s). Final interpretation of the results should be deferred until the summary report is available.
